To whom it may concern,

The Public Health Service Foreign Quarantine Regulations (42 C.F.R. 71.54) govern the importation of etiological agents, hosts, and vectors of human disease into the United States. A U.S. Public Health Service (PHS) import permit is not required for non-infectious materials (e.g., formalin-fixed specimens, tissues, or slides), or human or animal diagnostic specimens such as urine, in which there is no evidence or indication that such materials contain an infectious agent.

The Centers for Disease Control and Prevention has determined that the materials constituting this shipment contain non-infectious material (i.e. urine) and thus do not require a U.S. PHS Import Permit. In order to facilitate clearance of these materials not requiring a U.S. PHS Import Permit, please note the following:

1. The materials contained herein are human saliva and urine samples.
2. None of the materials contained herein are known or suspected to contain an etiological agent, host, or vector of human disease.
3. The materials contained herein have been packaged, labeled, and transported in accordance with all applicable regulations.

If there are any questions regarding this shipment, or any additional information required to secure clearance of these materials, please contact the undersigned directly at 503-687-2050.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mark Newman', is positioned below the 'Sincerely,' text.
